The Russian Gas Industry to 2020 provides an in-depth look at the world’s largest gas industry, as it prepares to cope with the challenges of changing commercial environments in its major export markets and demands for greater corporate transparency at home. The report begins with an overview of the far-reaching political and economic changes that have swept Russia since Vladimir Putin was elected president of the Russian Federation in March 2000. Among other things these resulted in the May 2001 decision by Gazprom’s board of directors to name Putin ally Vladimir Miller as the company’s chief executive. To a considerable extent Miller is associated with an ambitious program to reform the Russian gas sector. According to the Russian Ministry of Economic Development and Trade, the key to the new program is opening up Gazprom’s immense pipeline system through transparent pricing to 3rd party providers. This would clear the way for splitting up Gazprom’s upstream operations into separate production entities—Yamburg, Urengoy, Nadym and Noyabrsk among them. These entities would gain equal access to Gazprom’s domestic and international pipeline system, which would be re-constituted as an independent corporate entity.

The Russian Gas Industry to 2020 examines the problems and prospects for Russia’s ambitious gas reform program, and considers its impact upon the future development of the Russian gas industry as a whole. Key issues examined include Russia’s rapidly changing political and commercial environment; Gazprom’s sometimes problematical business culture; major political and economic problems in Russian gas reform; the impact of Russian gas reform on the development of Russian gas exports; the role of foreign investment in Russian gas development; and Russia’s relations with both gas producers and gas consumers in the independent republics of the former Soviet Union. Special attention is paid to the future of Russian gas exports to Europe, particularly within the context of the liberalization of energy markets in the European Union. Also considered is the possible role of East Siberian gas in allowing new Russian penetration of rapidly growing gas markets in Japan, Korea and China.

The main question the report addresses is Russia’s best strategy for expanding its gas exports and so improving its balance of payments. One school of thought holds that Russia should create an improved climate for foreign investment. This would lead to expanded domestic gas production and greater penetration of foreign export markets. A rival school of thought holds that acquisition of relatively cheap Turkmen and Uzbek gas supplies would go a considerable ways towards fulfilling Russia’s European export requirements. This would preclude the need for large-scale foreign investment (and its sometimes troubling political implications) and also reduce the urgency of gas sector re-structuring.
Chapter 1: The Political Dimension
Vladimir Putin and the New Environment in Russia
Recent Maco-Economic Successes and Future Prospects
The Impact of September 11 - Russia in the Minds of the International Hydrocarbon Community

Chapter 2: Russia’s Gas Profile
Reserve Estimates and Major Fields
Gazprom’s Perspective on Foreign Investment
Gas Infrastructure
Russia and the Greater Eurasian Gas Production Complex
The Future Russian Gas Balance
Gas Balance Implications

Chapter 3: The Gazprom Monopoly
Company Profile
Gazprom’s Murky Past
Gazprom’s Dealings and Shareholder Confidence

Chapter 4: Russian Gas Re-Structuring
The Ministry of Economic Development and Trade Re-Structuring Blueprint
Issues in Russian Gas Re-Structuring
Political Considerations
Prospects for Russian Gas Re-Structuring

Chapter 5: Foreign Investment in the Russian Gas Industry
Pros and Cons
The PSA Framework
Recent PSA Developments
Recent Sub-Soil Licensing Developments
Issues for Foreign Investors in Caspian Sea Waters
Tax Changes
Expatriate Tax Exposure in the Russian Federation
Chapter 6: Russian Gas Development and Russia’s Relations with FSU Republics

The Ukraine
Russia and Central Asia—A Tactical Perspective
Turkmenistan
Uzbekistan
Tajikistan
Kazakhstan
Azerbaijan
Kyrrgyzstan
Central Asian Gas Export and Russia

Chapter 7: Russian and the European Gas Market

Russian Sales Targets
The Competition
The European Gas Market—Country by Country Survey
Russia’s European Gas Infrastructure—Enough Capacity?
European Gas Liberalisation and Russian Gas Exports

Chapter 8: Russia and Asian Gas Exports

The Asian Gas Market
Sakhalin Gas Development and the Japan Gas Pipeline Project
Korean Gas Export Projects
Chinese Gas Export Projects

Chapter 9: The Future of the Russian Gas Industry

Russia and the World Gas Trade
The Importance of Gas Industry Re-Structuring in Russian Gas Development
A Paradigm for the Russian Gas Industry in 2020

Emerging Markets Online specializes in market research support for international business development executives.

Emerging Markets Online (EMO) provides customized market research and consulting services for the energy, telecommunications and utilities sectors worldwide. EMO specializes in providing each customer with personalized market research and business development support. Our global team of consultants specializes in management consulting, marketing and distribution strategies, project finance, tender and bid support, supplier strategies, and partner facilitation.

Customized Consulting Services

Introduction

Emerging Markets Online (EMO) provides customized market research and consulting services for the energy, telecommunications and utilities sectors worldwide. EMO specializes in providing each customer with personalized market research and business development support. Our global team of consultants specializes in management consulting, marketing and distribution strategies, project finance, tender and bid support, supplier strategies, and partner facilitation.

Research and Consulting Services

When you are preparing for a specific project, EMO’s team can help. We will work with you to identify and assess emerging market opportunities and challenges. EMO helps clients to:

- Develop research initiatives with direct surveys of markets, competitors, prospective suppliers and government regulatory and procurement entities;
- Perform due diligence and investigative research on specific companies;
- Identify new business opportunities in regional and local markets;
- Facilitate Joint Venture activities and identify prospective partners;
- Provide assessments of sales and distribution channels;
- Track competitor’s activities;
- Forecast market growth potential for products and services;
- Analyze new trends in the industry;
- Acquire strategic information on utility markets deregulation, liberalization and privatization initiatives;
- Develop strategies for competitive tenders and bidding scenarios

Customized Consulting Services

Recent Consulting Projects
EMO has helped dozens of clients worldwide assess emerging market challenges and identify new growth opportunities. Here are a few examples of recent projects EMO has completed for our clients:

⇒ EMO advised the M&A director for a major multinational E&P corporation on how current LNG projects are structured and financed. This included an analysis of the mix of private finance, commercial finance, ECA and multilateral finance, and engineering finance in current projects. The assignment included a matrix of how current LNG projects are financed by participant and percentage. EMO also provided details of how key LNG projects were structured and financed in Egypt, Trinidad, Qatar, Oman, Baja Mexico, and Nigeria. Finally, we identified three major trends in the financing of LNG projects.

⇒ Consulted a major Russian oil and gas company on the practices of U.S. refinery operating companies. Performed a survey of refinery companies, detailing management practices, investment and purchasing activities, refinery manager roles and responsibilities, and downstream operations. Produced a report of recommendations for applying western practices in refinery management and operations to Russian firm.

⇒ Supported a major law firm with an in-depth assessment of South Africa's natural gas market. Produced a survey and a report of key players, existing operations, exploration activities, pipeline developments, major contracts, pricing mechanisms, and the outlook for downstream natural gas markets.

⇒ Consulted a major U.S. pipeline company in its transition from an energy utility to a broadband telecom services and trading company. Activities include due diligence, competitor assessments, supplier surveys, and regulatory analysis.

⇒ Produced a due diligence assessment on a major electric and natural gas company’s operations in Latin America.

⇒ Created a market assessment for a major European utility regarding the market for power generation, transmission and distribution in eastern Europe.

⇒ Identified prospective buyers for a cellular license for a Latin American country in support of a big-five consulting firm’s representation of a Latin telecommunications operating company.
